

BRC01 – LADDER RESTRAINT BRACKET

The System

Parapet type ladder restraint bracket is designed to provide safe/secure attachment point to the extension ladders while accessing a roof area.

Special Features:

- ✓ Unobtrusive
- ✓ Easy installation
- ✓ Extra deep design prevents ladder movement or slipping

Uses:

Provides a secure point onto which a ladder can be attached to prevent movement or slipping.

Can be installed onto concrete, masonry or metal parapet walls and like structures.
